Summary

I started my career in 1987, as information systems manager for Credit Commercial de France (CCF). Afterwards I traded bonds and options on bonds and futures.

I joined CCF ALM department shortly after its creation, in 1991. I actively took part in the of the interest rate management on the banking book, which I headed. I actively took part in the design and implementation of the Fund Transfer Pricing (FTP) system for CCF.

In 1998, I became head of Internal Audit and Compliance for the Investment Banking Department of HSBC France, after it took over CCF.

I joined CSC as a Senior Manager in 2000 to develop and manage the ALM and financial risks management practice, concentrating on :

- ✓ ALM strategy, re-engineering and software choice
- ✓ Risk management (interest rate, liquidity and credit risk)
- ✓ Basel II
- ✓ Internal Audit, compliance and anti-laundersing
- ✓ IAS 39 hedge accounting

I work as a contractor since the end of 2004
